PAS 96:2014

Protecting and defending food and drink from deliberate attack

David Bell
Director, Standards Policy
Contents

• History of PAS 96

• Revision of PAS 96

• Response and use of PAS 96
History of PAS 96

• Most food is prepared safely... but accidents do happen

• Hazard Analysis Critical Control Points (HACCP)

• Can HAACP help with intentional contamination?

• Threat Assessment Critical Control Points (TAACCP)
Revision of PAS 96

• Sponsored by Defra and the Food Standards Agency

• Provides approaches to improve supply chain resilience to fraud or other attack
  • Identifying different types of threats organizations should consider
  • Understanding the potential attacker(s)
  • Assessment of threats (likelihood v impact) and organizations vulnerabilities
  • Critical and proportionate controls that might be applied to reduce risk
  • How to respond to an incident
  • Example case studies

• PAS 96 is a risk management tool
"BSI and Defra should continue to focus on the TACCP approach, and to consider the overlap and avoid duplication between malicious contamination and food crime...

This approach will provide the building blocks of any future standards that could be developed on preventing food crime".

The 2014 Elliott Review into the Assurance and Integrity of Food Supply Networks
Response to and use of PAS 96

- PAS 96 and other standards
- PAS 96 going global?
- PAS 96 as an auditable standard?
- BSI welcomes your opinions...
